

## Why add water?

In a word: pleasure. Water features transform an outdoor living space into a beautiful paradise where you can relax, unwind, and enjoy quality time with family and friends. Water features become the focal point of any garden with their melodious tunes and natural ability to attract a variety of birds and butterflies. Whether you tuck a decorative fountainscape near the entrance of your home or create a backyard habitat with an ecosystem pond and waterfall, you'll find each day enhanced when you waterscape your landscape. Liquid Landscapes has three entry level water features to help you get your water feature lifestyle started today.

Liquid Landscapes™ is the collaboration of four certified pond building companies: Elgard Brothers Landscaping, Inspired Design Landscapes, Landscape & Water Creations, and Urban Landworks.

These experienced landscapers are collectively promoting, designing and installing three popular types of water features: fountainscapes, pondless waterfalls and ecosystem ponds.

They blend innovative design with proven installation techniques and use only professional quality products from Aquascape Inc. and its authorized distributor Hedberg Landscape & Masonry Supplies. This ensures that you will be completely satisfied with your new Liquid Landscapes water feature.

# Add Liquid to your landscape

## BASALT FOUNTAINSCAPE

Fountainscapes can add the sights and sounds of water to your landscape without the investment or space needed for a larger water feature. This decorative basalt column feature is nestled atop an underground reservoir that houses the water, re-circulating pump and plumbing. The water is pumped up through the stone feature and is recycled after it falls back into the basin.

Available upgrades include a variety of statuary, drilled boulders and rock spires, plant packages and different styles/colors of decorative rock for the base of the fountainscape feature.

**MONGOLIAN BASALT FOUNTAINSCAPE**

**\$1,949 (Installed)**

## PONDLESS™ WATERFALL

Pondless® Waterfalls are simply a re-circulating waterfall and stream without the presence of a pond. The disappearing water is captured in an underground reservoir and is pumped back up to the top of the feature. Enjoy the sight and sound of running water without the maintenance of a pond.

Available upgrades include stream additions, plant packages and different colors and styles of stones.

**4'X6' PRO-FIT MICROPONDLESS™  
WATERFALL BASIN WITH STREAM**

**\$3,999 (Installed)**

## 6' X 8' POND

Our small pond incorporates both mechanical and biological filtration. The standard installation includes pond liner, plumbing, pump, skimmer, filter, lights, gravel, standard rock and boulders.

Available upgrades include beautiful plant and fish packages to create an ecosystem where all components interact to keep the pond naturally balanced (thereby minimizing maintenance), IonGen water clarifier, stream additions, statuary and a wide variety of colors and styles of stones to naturalize or accessorize your pond.

**6'X8' PRO-FIT POND**

**\$4,999 (Installed)**
